About SDT

The SDT token is a foundational cryptocurrency based on BEP20 that allows investors to hold Millions, Billions, or even Trillions of it in their wallets. Between its international recognition and its legitimate utility, SDT have plan to make it up thousands of times and isconstantly expanding its reach. SDT is the fasted token, which offering airdrops without Dapp browser. In addition, team want to make it established as brand as well as working to make it popular as mass payment method.

The Super Future of Super Digital Token

SDT Team have plan to launch another token with a community with a vast number of people, which is “Super Digital Token Wallet (SDTW)". Now the good news is, we have plan to distribute its airdrop to 100,000 holders by its own mobile application. The super digital token wallet app's special features will be, not only this token, it will supported by all BEP20 & ERC20 Tokens of market. Anyone can hold any token asset here easily with high security. IN addition, we have plane to add here decentralized exchange and SWAP functionality "Super Digital SWAP". Moreover, we have plane to add functionality of a Cryptocurrency exchange and trading platform "Super Digital Exchange" gradually. After all, we have plan to make it world's leading cryptocurrency mobile wallet platform. Within all this, we will try to expand our business in this field to make new brand and to establish existing brands.
